

	LOW RISK CASUAL CONTACT	CASUAL CONTACT	VACCINATED CLOSE CONTACT	UNVACCINATED CLOSE CONTACT
Quarantine requirements	None	Quarantine until first negative test	Quarantine for 7 days from exposure	Quarantine for 14 days from exposure
Testing requirements	None	<ul style="list-style-type: none"> Get tested immediately Get tested at any time if symptoms develop 	<ul style="list-style-type: none"> Get tested immediately Get tested again on day 5 Get tested at any time if symptoms develop Negative day 5 test required to be released from quarantine	<ul style="list-style-type: none"> Get tested immediately Get tested again on day 5 and 12 Get tested at any time if symptoms develop Negative day 12 test required to be released from quarantine
Any contact who develops symptoms must get a throat-nose swab (PCR) and isolate until result is known and symptoms have resolved.				
Other requirements	None	From days 1 to 14: <ul style="list-style-type: none"> Encouraged to wear a mask when around others at all times when outside your own home 	From days 8 to 14: <ul style="list-style-type: none"> Wear a mask when around others at all times when outside your own home Do not enter a high-risk setting (e.g. hospitals, aged care, disability, corrections) except for essential reasons 	Not applicable
Household quarantine requirements	None	None	People in same household as the contact who are unvaccinated must also follow the above quarantine and testing requirements (unless they can be appropriately separated from primary contact) People in same household as the contact who are vaccinated do not need to quarantine and only need to get a test on day 1 and 5.	People in same household as the contact who are unvaccinated must also follow the above quarantine and testing requirements (unless they can be appropriately separated from primary contact) People in same household as the contact who are vaccinated need to quarantine for 7 days and get a test on day 1 and day 5 (unless they can be appropriately separated from primary contact) If the contact is under 12 years old, people in the same household who are vaccinated do not need to quarantine and only need to get a test on day 1 and 5.

Notes:

- A close contact is a person who has had at least 15 minutes face-to-face contact with a COVID-19 case in the business or venue.
- Contact tracing for the public is conducted by Queensland Health's Public Health Units. You will be categorised on a risk based assessment with consideration to your vaccination status, mask use, environment, activities taken and other epidemiological and environmental factors.
- This is a general guide only. Additional testing and quarantine requirements may apply to individual cases based on a risk assessment.
- Vaccinated refers to a person who is greater than 7 days following receipt of the final dose of a primary course of COVID-19 vaccine approved or recognised by the Therapeutic Goods Administration (TGA).
- Notes: COVID-19 tests for contacts must be PCR tests. This applies to children and adults of all ages.
- Household is defined as residing in same dwelling overnight, intimate partners, and other household-like settings.

THE 'NEW NORMAL'

Maintain physical distancing (1.5m)

Wear a mask when you're required to

Maintain good hand hygiene

Stay at home when sick
